Available on Bandcamp, AppleMusic, Spotify, MCMGM.xyz and other online distributors November 2021

Electronica is challenged head-on with music that gets straight to the point.
Textures and melodies shift in surprising ways, teasing out the sway and insisting on the stomp.
Moody, energetic, soulful, artful. Let this one spin.

ARTIST BIO

Gunnar Madsen, aka MCMGM, is a Lion of alternative and art music, a Grammy nominee with over 20 releases spanning decades and multiple genres.

As a songwriter/arranger for acclaimed international sensation The Bobs, he broke the precious norms of vocal music and spawned an acapella renaissance. His Off-Broadway musical based on the life and work of The Shaggs was praised as "Unsettling, disturbing, challenging, even a little awe-inspiring" by the New York Times . His bizarrely witty albums for children have won every major award. You've heard his music in Sex and the City and on The Tonight Show; he's appeared on major concert stages in Europe and North America. He's written for the Minnesota Opera, Lincoln Center, Universal Pictures and National Public Radio.

Gunnar's restless breaking of musical borders led him into the world of electronic music, and to the creation of MCMGM – an 'alter ego', setting his vast musical knowledge and style against a modern electronic sound, creating something unique within the electronic music genre.
